Privacy Preference: Don't withhold name or address from public record

Comment Submitted:

One way to address environmental concerns and turn energy corridors into a plus for wildlife is use these corridors as an extension of wildlife green belts. If we ensure that there is adequate width to these corridors, allow natural passage of rivers and streams and create green belts, road underpasses or overpasses for animals, this can be a boon to the environment and not just a disruption. This should be studied in conjunction with the Grizzlie Corridor Program, and studied for connecting wildlife areas.
