

Proposed Section 368 Energy Corridors

Introduction

This Large Scale Base Map Series attempts to depict the Proposed Section 368 Energy Corridors at a meaningful scale. At this scale (approximately 1:1,000,000) the actual area being considered for designation can be discerned down to a minimum width of approximately 1,000 feet. Designated widths of less than 1,000 feet are depicted with a centerline, which is not to scale.

Because the accuracy of the available data does not support display at larger scales, this series offers the most detailed depiction available on a west-wide basis.

Using the Detailed Maps

To find the map for a particular area, refer to the alpha-numeric index (at left). Each alpha-numeric pair is a Map Identifier. Turn to the map on the following pages with the same Map Identifier. For example, maps A3 and A4 depict the coast of Oregon. The corresponding maps will be labeled "Map A3" and "Map A4". The index shows maps depicting part of the Section 368 Energy Corridors with a green tint. Maps not depicting a part of the Section 368 Energy Corridors are not included in the series.

- Energy Corridors under the Proposed Action
- International Boundary
- State Boundary
- Map depicts Energy Corridor
- Map not printed
