
Selected Potentially Sensitive Visual Resource Areas Within or Near Proposed Energy Corridors

Introduction

This map series identifies locations where selected potentially sensitive visual resource features would be intersected by, or be in close proximity to (within five miles of corridor), energy corridors designated under the Proposed Alternative of the Programmatic EIS.

The selected potentially sensitive visual resource features shown on the maps include National Parks, National Monuments, National Recreation Areas, National Natural and Historic Landmarks, National Scenic and Historic Trails, National Scenic Highways (including All-American Roads), selected USDA Forest Service Specially Designated Areas, National Wildlife Refuges, National Wild and Scenic Rivers, and a variety of National Park Service properties, including National Preserves, National Reserves, National Seashores, National Historic Sites and Parks, National Battlefields, National Memorials, National Memorial Parkways, and the San Francisco Presidio. These features are labeled on the maps.

Boundaries which are too small to be seen on the map are represented by a dot at the same location.

- Energy Corridors under the Proposed Action
- International Boundary
- State Boundary
- Map depicts West Wide Energy Corridor
- Map not printed
