Privacy Preference: Withhold name and address from public record

Comment Submitted:

Maps are too small to observe the real locations of corridors:

1. maps should be within regions, states or tributary boudary 2. region maps could be larger & r/way with satellite imagery to get better picture of terrain, alternatives, rivers, cumulative impacts; 3. Public cannot comment on what it cannot see - if maps are lacking of r/way then public input to NEPA cannot continue until that information is presented;
4 no comments from USFWS? where are the federal agency comments on wildlife/fisheries impacts?
